SOLAR ENERGY

## Environmentally friendly energy use

The use of solar power generation equipment on the factory roof can generate approximately 4.3 million kilowatt-hours of power for self-use every year, thus reducing the use of other energy sources in China factory.

## Reduced gas emissions

INNOVA uses natural gas instead of heavy oil combustion, and the boiler carbon dioxide emissions can save 80 kg/ton per ton of steam in Taiwan and China factory.

## Restore a large number of trees and sustainable organisms

Actively restore trees in the factory area to reduce carbon dioxide emissions in China factory.

## EU New rules on deforestation

EU New rules on deforestation-free products. InnoVA will follow this rule and imported those natural rubber with the EUDR certificate for our European customers to meet the requirement of EU rule.

## Actively participate in social welfare activities

INNOVA donate scholarships for poor students, sponsor school bike teams, happy children's angel cycling activities, and organize bicycle races.

## Material recycling

INNOVA use recycled fishing nets to make tire casing + recycled carbon black + recycled rubber + carbon black-free formula in Taiwan and China factory .

## Energy-saving ventilation equipment

INNOVA uses environmentally friendly ventilation equipment for rest and standby, which can save 17% of electricity every month in Taiwan and China factory .

## Production equipment energy-saving system

Extruders, air compressors, and other related equipment in the factory all use variable frequency voltage systems, which can save about 50% of electricity every month in Taiwan and China factory.

## Reduce petroleum materials

Soy bean oil to replace the existing petroleum process oil + silica powder to replace carbon black formula in Taiwan and China factory .

## Corporate Governance

The business philosophy and company culture are clear, and the operation and governance are transparent. Two operating meetings, board meetings and one shareholders meeting are held every year. The company also formulates short, medium and long-term development plans in line with various international management indicators and market needs.

# E-BIKES

## E-25/E-CARGO

### E-25

For E-BIKES up to 25 km/h.

### E-CARGO

Be recommended with Super Guard - special 6 ply tire construction for e-cargo. Not only enhances the puncture protection, but also increases the sidewall stiffness.
